

Installation

Service : Installation

With a team of skilled and experienced workers, we have installed and built telecommunications networks for our clients since 1993.

Our experience includes:

- Lash, pull or direct burial of any type of cable (fiber optic, coaxial, copper)
- Construction of aerial support structures (pole, strand, anchor)
- Supply & installation of ductwork (open trench or directional drilling)
- Turnkey project management
- Storage of client reels
- 24/7 emergency repair service

Equipped with a fleet of specialized vehicles, the Teltech Telecommunications team provides the installation quality that meets your needs and standards.
